Index for Volume 37

This annual index is organized by first author and by title. Page numbers refer to the following issues:

Number 1 (January): 1–80
Number 2 (March): 81–176
Number 3 (May): 177–256
Number 4 (July): 257–336
Number 5 (September): 337–416
Number 6 (November): 417–496

Title Index

A robust solution for dealing with environmental changes in intercepting moving balls, *Chardenon, A., Montagne, G., Laurent, M., & Bootsma, R. J.*, 52–64.

Alternate-response preparation in a visuomotor serial task, *Gómez, C. M., Vaquero, E., Vázquez, M., Gonzáles-Rosa, J. J., & Cardoso, M. J.*, 127–134.

Coordination dynamics of the horse~rider system, *Lagarde, J., Peham, C., Licka, T., & Kelso, J. A. S.*, 418–424.

Deliberate control of continuous motor performance, *Bosga, J., Meulenbroek, R. G. J., & Rosenbaum, D. A.*, 437–446.

Developmental changes in the response to obstacles during prehension, *Tresilian, J. R., Mon-Williams, M., Coppard, V. L., & Carson, R. G.*, 103–110.

Dissociation of bimanual responses with the Simon effect: On the nonunitization of bimanual responses, *Miller, J. O., & Franz, E. A.*, 146–156.

Dual-task-related gait changes in the elderly: Does the type of cognitive task matter? *Beauchet, O., Dubost, V., Aminian, K., Gonthier, R., & Kressig, R. W.*, 259–264.

Dual-task training reduces impact of cognitive task on postural sway, *Pellecchia, G. L.*, 239–246.

Duration of mentally simulated movement: A review, *Guillot, A., & Collet, C.*, 10–20.

Effect of orienting the finger opposition space in the control of reach-to-grasp movements, *Rand, M. K., & Stelmach, G. E.*, 65–78.

Effects of velocity and limb loading on the coordination between limb movements during walking, *Donker, S. F., Daffertshofer, A., & Beek, P. J.*, 217–230.

Effects of visual and auditory short-term memory tasks on the spatiotemporal dynamics and variability of postural sway, *Riley, M. A., Baker, A. A., Schmit, J. M., & Weaver, E.*, 311–324.

EMG activity in selected target muscles during imagery rising on tiptoes in healthy adults and poststroke hemiparetic patients, *Dickstein, R., Gazit-Grunwald, M., Plax, M., Dunsky, A., & Marcovitz, E.*, 475–483.

Emotion and motor control: Movement attributes following affective picture processing, *Coombes, S. A., Janelle, C. M., & Duley, A. R.*, 425–436.

The excitator as a minimal model for the coordination dynamics of discrete and rhythmic movement generation, *Jirsa, V. K., & Kelso, J. A. S.*, 35–51.

From egocentric to exocentric spatial orientation: Development of posture control in bimanual and trunk inclination tasks, *Roncesvalles, M. N., Schmitz, C., Zedka, M., Assaiante, C., & Woollacott, M.*, 404–416.

Gaze-dependent deviation in pointing induced by transcranial magnetic stimulation over the human posterior parietal cortex, *van Donkelaar, P., & Adams, J.*, 157–163.

Gender differences in leg stiffness and stiffness recruitment strategy during two-legged hopping, *Padua, D. A., Carcia, C. R., Arnold, B. L., & Granata, K. P.*, 111–125.

Grip width and the organization of force output, *Jordan, K., Pataky, T. C., & Newell, K. M.*, 285–294.

Hemispheric competition in left-handers on bimanual reaction time tasks, *Shen, Y. C., & Franz, E. A.*, 3–9.

The human motor control system's response to mechanical perturbation: Should it, can it, and does it ensure stability? *Hasan, Z.*, 484–493.

Intermittency of visual information and the frequency of rhythmical force production, *Sosnoff, J. J., & Newell, K. M.*, 325–334.

Lateralization of bilateral transfer of visuomotor information in right-handers and left-handers, *Inui, N.*, 275–283.

Learning the pedalo locomotion task, *Chen, H.-H., Liu, Y.-T., Mayer-Kress, G., & Newell, K. M.*, 247–256.

Movement-related sensory feedback mediates the learning of a new bimanual relative phase pattern, *Atchy-Dalama, P., Peper, C. E., Zanone, P. G., & Beek, P. J.*, 186–196.

Muscle activation is different when the same muscle acts as an agonist or an antagonist during voluntary movement, *Shapiro, M. B., Prodoehl, J., Corcos, D. M., & Gottlieb, G. L.*, 135–145.

Observational learning: Effects of bandwidth knowledge of results, *Badets, A., & Blandin, Y.*, 211–216.

Online attentional-focus manipulations in a soccer-dribbling task: Implications for the proceduralization of motor skills, *Ford, P., Hodges, N. J., & Williams, A. M.*, 386–394.

Perceived arm posture and remote haptic perception of whether an object can be stepped over, *Wagman J. B., & Taylor, K. R.*, 339–342.

Plane of motion mediates the coalition of constraints in rhythmic bimanual coordination, *Salesse, R., Oullier, O., & Temprado, J.-J.*, 454–464,

Postural stability and hand preference as constraints on one-handed catching performance in children, *Angelakopoulos, G. T., Davids, K., Bennett, S. J., Tsorbatzoudis, H., & Grouios, G.*, 377–385.

Quantification of manual force control and tremor, *Spirduso, W. W., Francis, K., Eakin, T., & Stanford, C.*, 197–210.

Schema theory: A critical appraisal and reevaluation, *Shea, C. H., & Wulf, G.*, 85–101.

Self-selected visual information during discrete manual aiming, *Hansen, S., Cullen, J. D., & Elliott, D.*, 343–347.

Specificity of learning in a video-aiming task: Modifying the salience of dynamic visual cues, *Robin, C., Toussaint, L., Blandin, Y., & Proteau, L.*, 366–376.

Support for an explanation of the guidance effect in motor skill learning, *Anderson, D. I., Magill, R. A., Sekiya, H., & Ryan, G.*, 231–238.

Time course analysis of closed- and open-loop grasping of the Müller-Lyer illusion, *Heath, M., Rival, C., Westwood, D. A., & Neely, K.*, 179–185.

Timing precision in circle drawing does not depend on spatial precision of the timing target, *Biberstine, J., Zelaznik, H. N., Kennedy, L., & Whetter, E.*, 447–453.

Timing variability in circle drawing and tapping: Probing the relationship between event and emergent timing, *Zelaznik, H. N., Spencer, R. M. C., Ivry, R. B., Baria, A., Bloom, M., Dolansky, L., Justice, S., Patterson, K., & Whetter, E.*, 395–403.

Transfer, control, and automatic processing in a complex motor task: An examination of bounce juggling, *Bebko, J. M.,*

Time course analysis of closed- and open-loop grasping of the Müller-Lyer illusion, *Heath, M., Rival, C., Westwood, D. A., & Neely, K.*, 179–185.

Timing precision in circle drawing does not depend on spatial precision of the timing target, *Biberstine, J., Zelaznik, H. N., Kennedy, L., & Whetter, E.*, 447–453.

Timing variability in circle drawing and tapping: Probing the relationship between event and emergent timing, *Zelaznik, H. N., Spencer, R. M. C., Ivry, R. B., Baria, A., Bloom, M., Dolansky, L., Justice, S., Patterson, K., & Whetter, E.*, 395–403.

Transfer, control, and automatic processing in a complex motor task: An examination of bounce juggling, *Bebko, J. M.,*

Demark, J. L., Im-Bolter, N., & MacKewn, A., 465–474.
Understanding how speed affects performance of polyrhythms: Transferring control as speed increases, *Bogacz, S.*, 21–34.
Undisturbed upright stance control in the elderly: Part 1. Age-related changes in undisturbed upright stance control, *Berger, L., Chuzel, M., Buisson, G., & Rougier, P.*, 348–358.
Undisturbed upright stance control in the elderly: Part 2. Postural-control impairments of elderly fallers, *Berger, L., Chuzel, M., Buisson, G., & Rougier, P.*, 359–366.
The use of anticipatory visual cues by highly skilled tennis players, *Shim, J., Carlton, L. G., Chow, J. W., & Chae, W.-S.*, 164–175.
The use of (symmetry) group theory as a predictive tool for studying bimanual coordination, *Mulvey, G. M., Amazeen, P. G., & Riley, M. A.*, 295–309.
Visual search and coordination changes in response to video and point-light demonstrations without KR, *Horn, R. R., Williams, A. M., Scott, M. A., & Hodges, N. J.*, 265–274.

XX Publication required. Will be printed in the November 2005 issue of this publication. ☐ Publication not required.

17. Signature and Title of Editor, Publisher, Business Manager, or Owner: Executive Director — Date: September 29, 2005

I certify that all information furnished on this form is true and complete. I understand that anyone who furnishes false or misleading information on this form or who omits material or information requested on the form may be subject to criminal sanctions (including fines and imprisonment) and/or civil sanctions (including civil penalties).

Instructions to Publishers

1. Complete and file one copy of this form with your postmaster annually on or before October 1. Keep a copy of the completed form for your records.
2. In cases where the stockholder or security holder is a trustee, include in items 10 and 11 the name of the person or corporation for whom the trustee is acting. Also include the names and addresses of individuals who are stockholders who own or hold 1 percent or more of the total amount of bonds, mortgages, or other securities of the publishing corporation. In item 11, if none, check the box. Use blank sheets if more space is required.
3. Be sure to furnish all circulation information called for in item 15. Free circulation must be shown in items 15d, e, and f.
4. Item 15h., Copies not Distributed, must include (1) newsstand copies originally stated on Form 3541, and returned to the publisher, (2) estimated returns from news agents, and (3), copies for office use, leftovers, spoiled, and all other copies not distributed.
5. If the publication had Periodicals authorization as a general or requester publication, this Statement of Ownership, Management, and Circulation must be published; it must be printed in any issue in October or, if the publication is not published during October, the first issue printed after October.
6. In item 16, indicate the date of the issue in which this Statement of Ownership will be published.
7. Item 17 must be signed.

Failure to file or publish a statement of ownership may lead to suspension of Periodicals authorization.

PS Form **3526,** October 1999 *(Reverse)*
